

**Amendments to the Claims**

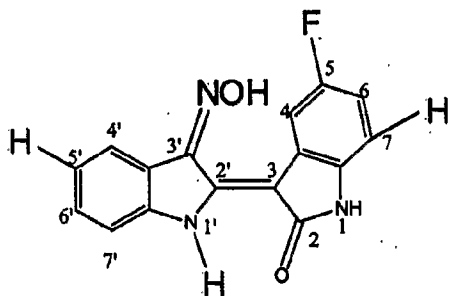

A full listing of the claims is as follows:

1-3. (Canceled)

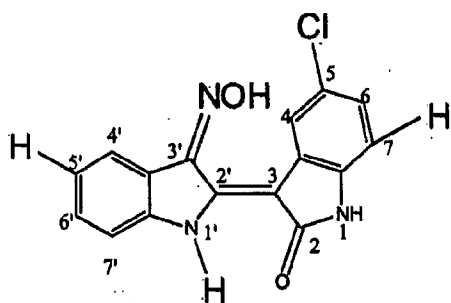

4. (New) An indirubin compound having an anti-proliferative property to a human cancer cell line selected from the group consisting of a human lung cancer cell line, a human stomach cancer cell line, a human colon cancer cell line, a human abdominal cavity cancer cell line, and a human leukemia cell line; and having a property for inducing apoptosis to a leukemia cell line by inducing differentiation as CDK inhibitor representing the following formula:

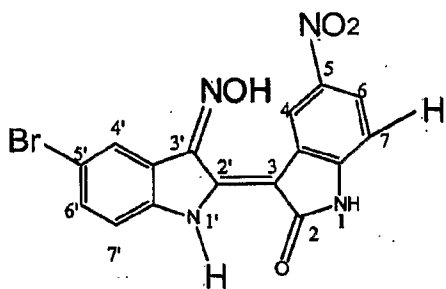

5. (New) An indirubin compound having an anti-proliferative property to a human cancer cell line selected from the group consisting of a human lung cancer cell line, a human stomach cancer cell line, a human colon cancer cell line, a human abdominal cavity cancer cell line, and a human leukemia cell line; and having a property for inducing apoptosis to a leukemia cell line by inducing differentiation as CDK inhibitor representing the following formula:

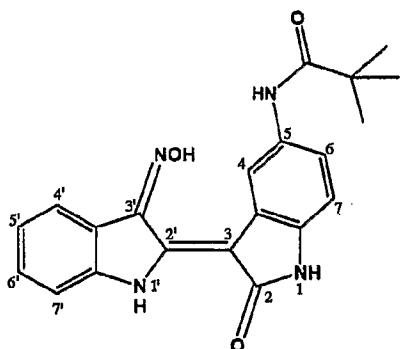

6. (New) An indirubin compound having an anti-proliferative property to a human cancer cell line selected from the group consisting of a human lung cancer cell line, a human stomach cancer cell line, a human colon cancer cell line, a human abdominal cavity cancer cell line, and a human leukemia cell line; and having a property for inducing apoptosis to a leukemia cell line by inducing differentiation as CDK inhibitor representing the following formula:

7. (New) An indirubin compound having an anti-proliferative property to a human cancer cell line selected from the group consisting of a human lung cancer cell line, a human stomach cancer cell line, a human colon cancer cell line, a human abdominal cavity cancer cell line, and a human leukemia cell line; and having a property for inducing apoptosis to a leukemia cell line by inducing differentiation as CDK inhibitor representing the following formula:

8. (New) An indirubin compound having an anti-proliferative property to a human cancer cell line selected from the group consisting of a human lung cancer cell line, a human stomach cancer cell line, a human colon cancer cell line, a human abdominal cavity cancer cell line, and a human leukemia cell line; and having a property for inducing apoptosis to a leukemia cell line by inducing differentiation as CDK inhibitor representing the following formula:

9. (New) A composition comprising 0.1 – 80 wt% of the compound of claim 4 and a pharmaceutically acceptable carrier.
10. (New) The composition according to claim 9 in the form of an injection formulation, capsule, tablet, solution, or pellet.
11. (New) A composition comprising 0.1 – 80 wt% of the compound of claim 5 and a pharmaceutically acceptable carrier.
12. (New) The composition according to claim 11 in the form of an injection formulation, capsule, tablet, solution, or pellet.
13. (New) A composition comprising 0.1 – 80 wt% of the compound of claim 6 and a pharmaceutically acceptable carrier.
14. (New) The composition according to claim 13 in the form of an injection formulation, capsule, tablet, solution, or pellet.
15. (New) A composition comprising 0.1 – 80 wt% of the compound of claim 7 and a pharmaceutically acceptable carrier.

16. (New) The composition according to claim 15 in the form of an injection formulation, capsule, tablet, solution, or pellet.
17. (New) A composition comprising 0.1 – 80 wt% of the compound of claim 8 and a pharmaceutically acceptable carrier.
18. (New) The composition according to claim 17 in the form of an injection formulation, tablet, solution, or pellet.
